THE REPLY FILED <u>01 May 2007</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:							
a) The period for reply expires <u>3</u> months from the mailing date of the final rejection.							
The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).							
Extensions of time may be obtained under 37 CFR 1.136(a). The date have been filed is the date for purposes of determining the period of exunder 37 CFR 1.17(a) is calculated from: (1) the expiration date of the set forth in (b) above, if checked. Any reply received by the Office later may reduce any earned patent term adjustment. See 37 CFR 1.704(b) NOTICE OF APPEAL	tension and the corresponding amount shortened statutory period for reply orig r than three months after the mailing da	of the fee. Continuation of 11. does NOT place the application in condition for allowance because: (a) Remarks, page 2, second paragraph: The argument is centered about the limitation that the bonding wire having an inductance that eliminates ripples in a frequency band characteristic of the one electronic component device.

The argument is not persuasive, because the limitation is clearly the intended of use of the bonding wire and is interpreted to only require the ability to so perform. In the case of product claim, only the structure of the claim distinguishes over the prior art.

(b) Remarks, page 2, first paragraph: The argument is centering about claim 10 (which contains a limitation that the inductance of the bonding wire is 1nm/mm).

Applicants should be noted that the limitation in claim 10 is identical to claim 9 which is about the optimum value of the inductance of the bonding wire. The Examiner has considered the inductance of the bonding wire is merely a matter of design choice. Furthermore, it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).
